PRISMA[®]

PRISMA PRO

BARRA LÁSER MOVIL PR56

Especificaciones;

Rated voltage: AC100V~230V 50~60Hz ± 10%

Rated power: 150W

Laser source: semiconductor pumped laser

Laser modulation: TTL

Laser power: 2500mW (500mW * 5PCS)

Laser color: RGB

LED: 6 5-watt Kerui light beads, beam angle 3-5 °, optional color temperature

Laser system: precision stepper motor scanning system with 360 degree controllability

Laser Effect: Laser Skynet Beam Performance, Laser Flowing Line Effect, Laser Stroboscopic Effect, LED Beam Sense, Flowing Stroboscopic Effect, etc

Control mode: voice control, self-propelled, DMX512, master-slave effect

DMA channel: 39 channels selectable

Usage environment: indoor

Applicable places: bars, KTVs, performance bars, dance halls, hotel banquet halls, entertainment venues, etc

Working temperature: -20 ° C~55 ° C
